

Alternatives' 20th Anniversary Index

Subject index

To celebrate our 20th anniversary of publication we have created an index of all the reports, features and podia we have ever printed. The trip back through the pages of *Alternatives* was both exhausting and engaging — truly a suitable anniversary activity. Along the way we got re-acquainted with many long-forgotten environmental battles and campaigns, recognized among our authors many Canadian environmental luminaries and noticed fascinating patterns in environmental interest reflected in our selection of articles. Comprised of two lists, one organized by subject category and one by author, we hope this index will satisfy readers who make use of *Alternatives* as a reference tool. The index spans from vol. 1:1 to 18:4 and will be updated periodically. All or part of it may be copied and distributed. The following are the subject category headings:

Aboriginal people
Agriculture and food
Arts and culture
Economics and trade
Education
Energy, hydroelectric
Energy, nuclear
Energy, solar, oil, conservation, etc.
Environmental philosophy
Foreign developments and international issues
Forest products industry
Global warming and ozone depletion
Grassroots environmentalism
Green consumerism
Hazardous waste and chemicals
Health, labour and occupational safety
Humour
Law, regulation and politics
Media
Northern issues
Pesticides and herbicides
Planning and landuse
Pollution, air (acid precipitation)
Pollution, water, and water management
Population
Science and technology
Social change
Social justice
Sustainable development/conserver society and conservation
Transportation
